

# Allhiphop Interview With Pete Rock

If you've been wondering where your favorite producer has been hiding, he's right here! Pete Rock has been one of Hip-Hop's most revered musicians since the early '90s. His melodic beats layered with thick basslines and distinct horns along with once partner CL Smooth was a breath of fresh air to consumers who were being smothered by more aggressive forms of music.

While the two parted ways musically, Pete forged on producing countless records and remixed for artist like 50 Cent, Brandy, Red Man, and Ghostface Killah. In addition to lacing other artist's albums, Rock also released a string of solo albums that incorporated some of Hip-Hop's most elite lyricists while flexing his own rhyming abilities.
