In celebration of Black History Month, the producers of VH1’s popular “I Love The” franchise present “Black to the Future,” a 4-part special celebrating the great contributions of African-Americans to pop culture. From “The Jeffersons” to the “Arsenio Hall Show,” from Barry White to Beyonce , and from the afro to the Jheri curl, each hour will revisit it all; from the most def to the most whack; from the 70s till now. In the famous words of Soul Train’s deep-voiced host Don Cornelius, “It’s going to be a stone-cold gas!” Don’t miss the trip!
