

# Lenny Kravitz-Black and White America (Live)

[youtube]-I72cn80kJs[/youtube]

There's no official video yet but here is Lenny Kravitz performing the title track to his latest album live. The song was inspired by Kravitz's experience hearing racist whites threaten Barack Obama's life if he became the president. His words also speak on his experience as the son of Jewish man and a Black woman. Unfortunately this song is very relevant and probably needs to be Obama's campaign theme.
