

# The Roots-undun Album Stream

You can go to the [NPR](#) site and hear a full album stream of The Roots' *undun*. The concept appears to be a reflective look at the life of Redford Stephens who dies a violent death after becoming a drug-dealing boy in the hood. But The Roots seem to take it farther by philosophically examining just how much of Stephens' life was free-will versus destiny. *undun* will be released on December 6th.
