

# De La Soul-God It Feat. Nas

De La Soul is joined by Nas on "God It" and they want everyone to know they still have their soul over James Brown-sounding horn stabs and beats. "God It" is a bonus because it won't be on their upcoming *And The Anonymous Anybody* which the fans have funded beyond expectation on Kickstarter. They've raised almost half a million dollars which is three times the amount of their goal and the campaign still has 10 days to go. Their Kickstarter efforts are not only important because of their welcomed return but it also dispels the myths that rappers over 40 don't sell, Old School hip-hop does not sell and that fans don't spend money on music anymore.
