

# Maxwell-Lake By The Ocean

[youtube id="9nJkGH80suo"] ["Lake By The Ocean"](#) is the first single from Maxwell's long-awaited second album in the *BLACKsummer'sNights* trilogy. The song he says is about finding love after going through personal challenges:

“Basically, the song represents falling in love after a very tough trial period in life and finding contentment in the smallest things next to the biggest things. Being content in a lake when you have an entire ocean near you is the epitome of true happiness. That you don't really need more; that you have more within the person that you're sharing whatever that experience is.”

The full-length project is expected July 1st.
