J.Dilla's long lost *Diary* album is noted for the rare vocals from the emcee/producer and guest appearances from a variety of rappers including Nas and Snoop Dogg. The instrumental version of *The Diary* is available now from [Rappcats](#) digitally and on vinyl until July 8th when it will be in all the usual purchase places. "Drive Me Wild" is produced by Karriem Riggins and the James Brown influence is interrupted in places by psychedelic guitars and ceremonial keys.
