

Omar- I Want It To Be EP Sampler

It's been three years since Omar's *The Man* and this year he will release his eighth studio album, *Love In Beats*. But before the arrival of *Love In Beats* he has prepared *I Want It To Be*, a 4-song EP that will be released before *Love In Beats*. You can listen to snippets of the songs and hear his collaborations with his brother Scratch Professor on the remix of the title track and a zouk-influenced soul jam with Guadelope-born singer Jean-Michele Rotin called "Destiny." The EP comes out on [Freestyle Records](#) this summer and *Love In Beats* will be released later this year.
