

Little Simz: Poison Ivy Feat. Tilla Official Video

[youtube id="Yfy2UQnWQ0w"] British rapper Little Simz just saw the release of the deluxe version of [*Stillness In Wonderland*](#). The new version of her second album has eight bonus tracks and has the option to be purchased in a two-LP vinyl pack. "Poison Ivy" featuring Tilla is the latest song to be made into a video. Little Simz looks more like a blues singer than a rapper as he plays the guitar in the darkness of the black and white visual.
