

Lenny Kravitz Deals With Relationships On Low

Lenny Kravitz's *Raise Vibration* album is being revealed for its versatility with the release of "Low" today. Kravitz previously shared the politically-inclined "It's Enough" and "Low" is the new single solely about relationships. He sings about the stress of trying to have love with a partner who is always challenging his self-esteem. Audiences who see Kravitz on tour this summer will get to hear music from *Raise Vibration* before it comes out in September.
