

Lion Babe Delivers The Second Part Of Their Visual Trilogy With Different Planet Video

[youtube id="YIRZIfwZsog"]Lion Babe delivers the second video in their trilogy with the release of the Dane Trippe-directed "Different Planet." Producer Lucas Goodman and singer Jillian Hervey are draped in shimmering colors as they symbolically experience other places outside of planet earth. But they are still firmly inside the globe when posing in front of a sunset and catching nightfall on the beach. They stated in a press release that the videos reflect the album's theme of finding oneself in the midst of change.Â

The third video in the trilogy from their [Cosmic Wind](#) album will come out March 31st.Â

In case you missed their dance-oriented cover of Nelly's "Hot In Herre" listen [here](#).Â
