

Azealia Banks Offers Music For The Quarantine With The Boastful Mamma Mia

Azealia Banks is in the blogs right now for threatening to expose Busta Rhymes if he doesn't release a song they worked on but in the meantime, the controversy-loving rapper releases "Mamma Mia." In three minutes Banks brags about destroying her rap competitors, rejecting men and being a kilo-dealing gangstress. She says it all within a vocoder that makes the song sound like new electro.Â
