

Nas: King's Disease Album Stream

Nas' *King's Disease* came out last weekend and his 13th album is exclusively produced by Hit-Boy. Fans are divided with one-half approving the project that finds him regrouping The Firm for "Full Circle" and others bring up the old criticism that his choice of beats is not strong. He has clarified that when he mentions Doja Cat in his song "Ultra Black" that he is not actually criticizing her. Big Sean, Charlie Wilson, anderson.paak, Foxy Brown, AZ, Cormega, Lil Durk, A\$AP Ferg and others have appearances on the album. The songs are autobiographical but it is not clear what the inspiration is behind the album's title.
