1. Was the Maybach Music press conference something out of the P.T.Barnum playbook?

3. Wouldn't it be a good thing for the hip-hop community to raise money for cancer research now that MCA of the Beastie Boys has passed?

Adam Yauch better known as MCA from The Beastie Boys has died from cancer. The Beastie Boys are considered The Beatles of hip-hop and were largely responsible for bringing the genre to suburban America when they debuted in 1986 with their highly influential multi-platinum *Licensed To Ill*. When LL Cool J helped induct them into the Rock Hall of Fame this year he reminded the audience that it was the Beasties who gave his demo to Rick Rubin. Last year's *Hot Sauce Committee* is their most current release and put them at the eight album mark. The Beasties are one of the longest living rap groups alongside peers like Public Enemy.
