

TJ Jackson Gets Closer To Album With New Single Mind Games

TJ Jackson shakes off romantic delusions on his new single “Mind Games.” His plea for clarity from a girlfriend is layered over a cordial pop melody and a soaring guitar. The third single from his tentatively titled *MMM* album is the next phase in the growth of his sound that is obviously influenced by his uncle’s mastery of the R&B ballad. Jackson’s third album finds him working on his artistry undeterred by the expectations some may have because of his family name. He says, “I am forging my own authentic path rather than following the pack of what others think I should be. I am a Jackson but I must be me.”

There is no exact date for Jackson’s third solo project but “Mind Games” is streaming everywhere. The new album will be his first and it follows his previous *Obsession* and *Damaged* EPs.

Listen : TJ Jackson Returns With Secret

TJ Jackson returns with a new sound and single in the form of “Secret.” Jackson first became famous as one-third of 3T with

his brothers in the '90s. Their debut album *Brotherhood* was produced by their uncle Michael and released on his MJJ Music label. The trio released their third album in 2015 and TJ started his solo journey in 2020 with the release of his *Obsession* EP. "Secret" is a gentle tribute to the chemistry of a budding romance. Jackson's subtle approach with "Secret" is one step in the path of courtship. His vocals and lyrics are sure of an approaching love but there is the kind of mystery usually attributed to classic R&B before hip-hop. TJ Jackson's "Secret" is on the way to the release of his full-length album *MMM* in the near future.Â
