Brother Ali Releases New Single Sensitive & Video

[youtube id="ZrzG3LkqPM8"] Brother Ali opens up about his career journey on the new single "Sensitive." He's unusually honest for a rapper about getting older and the challenges of surviving a new era of music. He shared the origins of "Sensitive" in a statement:

"Artists are often times faced with self-doubt and a deep sense that the world isn't hearing us as we'd like to be heard. This one was made at a time when I'd taken too long to release new music, had medical trouble with my voice, and felt like I'd alienated fans with my political statements."

On November 1st, Brother Ali will go on tour to celebrate the 15th anniversary of his debut album *Shadows On The Sun* by performing the entire collection. [Tickets](#) are available now and there will be limited VIP Meet and Greet options at each tour stop.
