

# North Elements & Wayfarer// Collaborate With Denitia On Break

Denitia has collaborated with Australian producers North Elements and Wayfarer// for the atmospheric [“Break.”](#) The song came together after the producers asked the NYC musician to lend her voice. North Elements used Kintsugi, the art of embracing damage as inspiration for the song about people embracing their imperfections. Denitia had this to say about the song, “I’ve been feeling extra intense lately, and these days, the world feels like it’s constantly caving in; when I find something I really want, it feels fragile and urgent. The pressure and the need to live truly in the moment when nothing else is ever promised.. it’s beautiful and scary all at once.. To find someone to fall apart with, it’s good company.”
