

# Driven Deliveries Inc. Announces Partnership With Rapper B-Real Of Cypress Hill

Driven Deliveries Inc. has partnered with B-Real's Dr. Greenthumb's Dispensary to serve as their direct-to-consumer cannabis products distribution. The Cypress Hill rapper launched the dispensary in Sylmar, California in August of 2018. The dispensary is full-licensed for medical and recreational use. All sorts of cannabis products, clothing and accessories are available at the store.

Driven Deliveries is the world's first and only publicly traded cannabis delivery company. They will deliver for Dr. Greenthumb and also build its online store to expand the customer base. There are plans to open another Dr. Greenthumb store in Sacramento, California on July 30, 2019. They have also identified other California locations and states where cannabis is legal.

B-Real is excited about the business and had this to say:

*"I consider myself to be incredibly fortunate to be part of another major inflection point. We are now able to see this partnership drive availability, brands, and revenues. This is the first of many significant projects you will see us pioneering together."*

Cypress Hill was one of the first rap groups to advocate for the medicinal and recreational use of cannabis. B-Real is also a member of the rap-rock group Prophets of Rage.
