Imperial Releases Debut Album Layers

Imperial releases his solo debut album *Layers* today and it is a collection of mostly carefree instrumentals. The producer leaked the jazzy “Transit” single one week ago and the mood-producing keys and tight snares gave the impression of an album suited for nocturnal listening. According to Imperial:Â

“Transit “is the final single from my debut instrumental album, Layers. It’s a chilled hip-hop head nodder perfect for an evening under the stars letting your mind take you on a journey to far off lands.”

Layers has that evening vibe throughout the playlist that is ideal for lounging or driving.
