

Jules Rendell Shares Visuals For The Return

[youtube id="7esa__vcvnw"] Jules Rendell debuted her first solo album this year after introducing herself with the 2013 *Lotusbloom* EP. Audiences heard a soulful jazz sound from the Birmingham, England native who calls London her home. "The Return" is from her new [Imagine](#) album and the video features Rendell and friends outside making abstract poses. On *Imagine* she incorporates more pop sounds into the music but never strays far from R&B. Of "The Return" she says,

'We spend our lives worrying about things that don't really matter. We chase after success, value achievement, and stature, but it's a trap that can tie us up. I think love is what can free us from all of that stuff – I long for that resting place of acceptance.'
