

# Fantastic Negrito Is Rolling Through California With Miko Marks

Fantastic Negrito and Miko Marks perform Negrito's "Rolling Through California" outdoors amidst Oakland Black Cowboy Association, a homeless encampment and the movements of a young boy. Negrito was inspired by California's lethal wildfires after waking up one morning to an orange sky. He was scared and wondered how will climate change, drought and water management be able to move forward in his home state and the country. His partnership with Defy:Disaster will give some of the revenue from the song to firefighters, first responders and communities affected by wildfires throughout America. People can also donate directly to the [organization](#).
