

Moog Music Offers Minimoog Sound App For Free Download Amid Cancellations In The Creative Community

Moog Music is offering its Minimoog sound app for iOS as a free download in response to all the cancellations in the creative community because of the coronavirus pandemic. Moog posted a message this afternoon:

A gift to spread positivity, creativity, and expressivity. A moment to slow down, appreciate our innate strength, and experience the uplifting power of sound. A chance to share the way we hear the world around us!Â

...and if it moves you, express yourself – The Minimoog Model D iOS app is free for download right now:
