[youtube id="_Gplpq10AEc"] Jay Electronica surprises with the release of his *A Written Testimony* debut album featuring Jay-Z. Electronica's introduction happened in 2007 with "Act I: Eternal Sunshine (The Pledge.)" The rapper had some guest appearances on songs like "Exhibit A" and "Exhibit C" with producer Just Blaze in 2009 and then disappeared. There were listening parties planned for *A Written Testimony* in multiple cities but they were canceled due to the coronavirus pandemic. Prince's Originals Streaming On Tidal

Today would've been Prince's 61st birthday had he not passed in 2016. The sting of his passing will never change but there will be new music from his estate for years to come. Prince's *Originals* is a collection of his songs that he gave to others like Sheila E and The Time curated by Jay-Z and Troy Carter. Listeners can hear songs like "Sex Shooter" which was recorded by Apollonia 6 in Prince's voice. *Originals* follows *Piano and a Microphone 1983* from 2018 and it is his second posthumous album.Â
